

Kell-Strom was founded in 1942 by Francis J. Kelly and three partners as a machine shop in Hartford, CT. The name came from Frank Kelly and Hans Lundstrom two of the original four founders. Prior to the end of WWII, the company became solely owned by Francis J. Kelly. The company moved to Wethersfield, CT in 1950 and remains at the same location today.

Early in it's history **Kell-Strom** began to specialize as a manufacturer of service tools for aircraft. In 1965 **Kell-Strom** was licensed by Pratt & Whitney Aircraft of Canada to manufacture and sell service tools in support of the PT6 engine recently developed by P&WC.

From the tremendous success of that engine, P&WC developed an entire family of turboprops and turbofan engines to serve the Regional and Corporate aviation markets. **Kell-Strom** has been part of that growth from that time.

Under the license agreement that we hold, **Kell-Strom** manufactures, markets and inventories tooling for the support of Pratt & Whitney Aircraft. The engine manufacturer does not have to concern itself with the logistics associated with supplying support equipment to their customers. They are able to proceed with building and selling the engines and spare parts that their customers require, knowing that **Kell-Strom** will assure that the tooling gets to the right place at the right time.

This concept has been proven to work effectively, and we have been fortunate to translate our first agreement with P&WC into other license agreements with other companies. We currently have agreements with Honeywell Aerospace, Champion Spark Plug, Haynes Diesel, Precision Airmotive, and Teledyne Continental Motors and a joint venture with DCN International.

JT15, PT6, PT6-T, PW100, PW300, PW500 Service Tooling; Nozzle Kits; Hot Section Kits; Spray/Guide Tubes; Turbine Blade Stretch Test Gauge; Turbine Shroud Radius Test Gauge; In-Situ Fuel Nozzle Cleaning Rigs

General Tooling including tools for Spark Plug Wrenches, Sockets, Cleaners, Wear Gauges, Trays, Gap Setting Tools, Lead Wire Wrenches; Oil Filter Wrenches, Oil Filter Can Cutters.

Bendix Fuel Controls service tooling

Reciprocating engine service tools. Available directly from Lycoming.

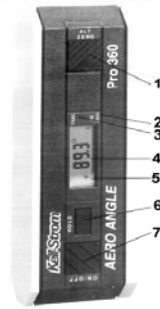

Light Harpoon Helicopter Landing System (Joint Venture)

Kel-Strom

PRO 360/3600 DIGITAL PROTRACTOR, LEVEL AND INCLINOMETER

A revolutionary tool that provides an immediate digital indication of level, plumb and all the angles in between. The machined aluminum frame with integral base of-the-art sensor and microprocessor circuit to provide unsurpassed accuracy throughout the protractor's 360 degree range. The PRO-360 (P/N KS5549, shown) has 0.01° and has an RS-232 compatible serial port for a computer interface and SPC records keeping. Click on model number for specifications.

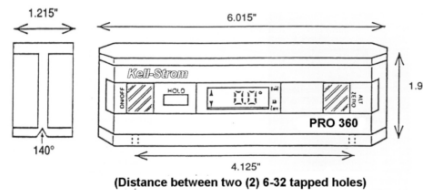

Pro 360; P/N KS5549

FUNCTIONS:

1. ALT ZERO Button (Alternate Ref.)
2. ALT ZERO Annunciator
3. HOLD Annunciator
4. Liquid Crystal Display (LCD)
5. Directional Arrows for Level / Vertical
6. HOLD Button
7. ON/OFF Button

PRO 360 DIMENSIONS

Range:	360 degrees (90 degrees X 4)
Resolution:	0.1 degrees
Accuracy:	+/-0.1 degrees at level, (+/- 10 degrees) and plumb, +/-0.2 degrees maximum error otherwise
Repeatability:	+/-0.1 degrees
Cross Axis Error:	Minimal
Supply Voltage:	9 volt alkaline battery
Battery Life:	500 hours (typical)
Temperature:	Operating: -5 deg. C - +50 deg. C (23 deg. F - +122 deg. F) Storage: -20 deg. C - +65 deg. C (-4 deg. F - +149 deg. F)
Weight:	289 grams (10.2 ounces)
